SUMMARY

Designer turned automation builder. At GooCampus I build the systems a 5-brand marketing and sales team runs on: **200+ n8n workflows**, WhatsApp and CRM lead flows, an internal marketing app used daily by the whole team, and **25+ landing pages**. I map the process with the people who use it, write the spec, design the screens, direct Claude Code to write most of the application code, and test every release against live data before it ships.

EXPERIENCE

Senior Graphic Designer

2024 – Present

GooCampus · Bengaluru (medical education and study-abroad consulting, 5 brands)

- **Lead Engine (n8n, Airtable, WhatsApp, Telegram):** one pipeline for **20+ lead sources** (Meta lead ads, website forms, landline calls, Instagram DMs, walk-in desks at 6 offices). A round-robin assigns every lead to a counsellor **within 2 minutes**, WhatsApps the lead and sends the counsellor a Telegram alert with a one-tap Call button. Zero manual copy-paste.
- **Marketing OS (product owner):** internal web app that **replaced 7 separate tools** and is **used daily by 5 people**: content pipeline with automatic routing, social scheduling, Meta Ads with an AI analyst, leads CRM, WhatsApp inbox, competitor and AI-search tracking, 50 built-in playbooks and a Claude connector (MCP). Wrote every spec and approved every release.
- **eBook Autopilot:** payment to delivery with no human step for 9 country pathway eBooks: payment verified, view-only access shared, buyer emailed and WhatsApped, team alerted. **107 Australia and NZ sales in Oct 2026**, fully hands-free.
- **Call Summary:** sales-call recordings transcribed and summarised into key points and next steps in Airtable every 10 minutes; switching the transcription model made it **about 33× cheaper** (₹0.50 per 30-minute call).
- **WhatsApp Scheduler:** replaced a **$50/month** scheduling tool with our own setup: any number of linked WhatsApp numbers, scheduled messages, polls and status posts to groups and contacts.
- **Landing pages:** designed and shipped **25+ pages for 8+ countries** in HTML and Tailwind, with checkout, lead forms posting straight to the CRM, and GA4, Meta Pixel and Microsoft Clarity tracking.
- Also built: an AI Counsellor that answers Instagram DMs from a knowledge base (RAG) and captures the lead; automatic branded voucher PDFs; exam-notice watchers (KEA, MCC, NMC) with AI summaries.

Manager, Campaigns

2022 – 2023

Aam Aadmi Party · India

- Led campaign creatives and coordinated designers and writers across teams to deliver on tight political-campaign timelines.

Graphic Designer

2018 – 2022

Wall of Tunes (2021 – 2022) · Freelance (2018 – 2020)

- Social media, event and brand creatives for a music brand and for small businesses: posters, logos and campaigns.

SKILLS

Automation	n8n (webhooks, APIs, error handling), Airtable, Supabase, Google Sheets, Apps Script
Messaging & CRM	WhatsApp Cloud API, Telegram bots, email automation, lead routing
Marketing tech	Meta Ads & Lead Ads, Meta Graph API, GA4, Meta Pixel, Microsoft Clarity, payments
AI	Claude and Claude Code, RAG chatbots, AI summaries and reports, MCP connectors, prompt design
Design & web	UI/UX, Figma, landing pages (HTML, Tailwind), dashboards, product demo videos
Ways of working	Process mapping, specs, testing on live data, plain-English team guides

EDUCATION

BCA, Computer Science

Bangalore University · 2014 – 2017
